**ON CALL PLANNING CONSULTING SERVICES (FY20-R-003)
QUESTIONS AND ANSWERS**

1. How many firms is DART anticipating to select to be "On-call"?

A: The answer to this is difficult to determine. DART will want all requested services in the RFP under contract. Ideally this would be with one (1) firm and their sub-consultants, but could potentially be with multiple firms.

2. Ridership Modeling: One option for ridership modeling is use the metropolitan regional model as a basis for increment of travel. Will the selected consultant have access to the DMAMPO model?

A: Yes, DART can request the outputs and underlying data files from the Des Moines MPO travel demand model.
