Clarification of the Project

FY26-I-003 Bus Wash

I want to clarify that this project is not a construction project. Based on some of the questions I received I want to make this clear. This project is to remove and replace the bus wash in the existing structure only. No alterations will be made to the building or surrounding areas for any reason.

All the A and E documents have been provided for informational purposes to give reference as to the current conditions and what to expect while performing the project to its completion. No construction is to take place on site at the DART Maintenance Facility 1100 DART Way Des Moines, Iowa 50309.

If there is an equivalent option that requires such alterations the bid will be rejected.
